nei-snaped cloud and carried 700 feet in the structure.

The cyclone, which came out of an almost clear sky, completely wrecked the building when it deposited it upon the ground, but the woman, aside from a few minor injuries, was not harmed. At the end of the air journey Mrs. Sumner fainted. Neighbors who saw the incident from distant points say the building was shattered against a cliff and reduced to kindling wood. Rushing to the aid of the woman, they found the building smashed and Mrs. Sumner almost buried in the debris.

The cloud touched no other dwelling in that locality, and there was no indication of a storm except in the precise spot hit. The shack is said to have been carried fifty feet in the air.
